MEMO DEALER LETTER JANUARY-2015

SD40-2W LOCOMOTIVES IN HO AND N SCALES

The eight paint schemes that are being offered this month include four ALL NEW decorative schemes that have never been done before. Also included are four of the more popular schemes that have been previously produced. Please note that a DC only version is offered in N scale and the HO locomotives can be equipped with a DC only plug option on request.

HO BI-LEVEL AUTO RACKS

This is a phenomenal model equipped with 18 separate etched metal panels to give these cars the most realistic look possible. The ten road names offered include five all new paint schemes and five previously offered that remain in high demand. All roads are available in six numbers.

HO 48' SMOOTH SIDED CONTAINERS

These commonly seen containers are offered in two-packs for each owner name. Three sets of each are available providing a total of six road numbers for each paint scheme. These colorful containers are a must for those of you who are able to run 48 footers.

VALUE LINE AEROFLO & AEROFLO II COAL GONDOLAS IN N AND HO SCALES

This is the fourth car released in the new Value Line from InterMountain and provides another option for unit train operation. Each paint scheme includes thirteen different numbers, two six-packs and a single car (a double rotary where prototypically accurate), to make it easy to run long trains.

Z SCALE ROKUHAN PRODUCTS

We just received a large shipment of Rokuhan products so check your stock and place your orders quickly. Some of the items are close to being sold out and it will be several weeks before they can be replenished.

HO LOCOMOTIVES – DC ONLY OPTION

To accommodate the predominance of DCC operation in the HO arena we are equipping all HO locomotives with electronics that will run in DC or DCC environments. Therefore, a locomotive can be run on a DC home layout and also on a sophisticated DCC club layout without modification. In cases where the modeler wants to run exclusively in a DC environment we have a simple modification to provide for DC only operation. This modification can be made prior to shipping the locomotive to our dealers, or after the fact by the modeler. The existing DC/DCC PC board in the locomotive can be exchanged for the necessary hardware or we will provide it at a small charge so that the modeler has the option of switching back and forth. An explanation of this modification can be found on the InterMountain website under the 'Customer Service' button.

HO Scale **N** Scale

SD40-2W Locomotives

Announced: January 16 Reservations Due By: February 28 Available: Aug / Sept

These InterMountain Railway Co. models are manufactured with the 4-window safety cab, the snow shields over the air inlets, and the distinctive stairwells and handrails. Both scales feature laser sharp painting and lettering, etched metal details, and wire grab irons. All locomotives are factory equipped with ESU sound decoder or ESU non-sound decoder. DC available for N scale and DC plug option available for HO locomotives by request

Motrak Models is the industry leader in offering model railroaders some of the finest castings in both HO and N Scale. These loads are made out of resin or Hydrocal base with your choice of coal, gravel, scrap metal, ore, scrap aluminum, taconite, woodchips, sulphur or sand. These freight car loads fit in select InterMountain Railway and Value Line by InterMountain models!

Value Line AeroFlo & AeroFlo II Coal Load
 (Same Product as the Value Line Coal Porter Load)
 HO comes in a 2 pack, N comes in a 3 pack
 MSRP: \$7.50

DeLuxe Innovations January 2015 N Scale Product Announcement

Announced: January 16, 2015 Orders Due By: February 28, 2015 Available: Second Quarter 2015

More New 40' Sheet and Post Container Roadnames Coming!

Last November we announced that we are producing a sheet and post smooth side 40' standard-height container in N scale. The sheet and post style container preceded the steel containers in use today and a number of shippers continued to buy them into the steel container era because they had lighter tare weights and a longer useful life than early steel containers.

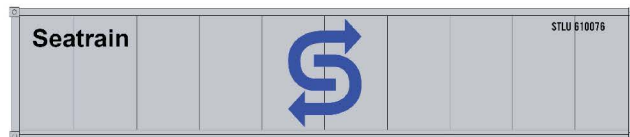

The following paint schemes are some of the earliest from the late nineteen seventies. These containers are a perfect complement to 85' and 89' flatcars and Twinstack well cars. The target MSRP is \$19.95 per 2-pack, \$44.95 per 5-pack.

N SCALE GUNDERSON MAXI-STACK IV

Suggested Retail Price: \$89.95 / 3pack

The Maxi-Stack® IV car is the mainstay of the United States domestic double-stack fleet. It provides a good balance between weight and capacity. It is a three-unit articulated double-stack car that can handle containers from 20ft. to 53ft. long in the well and containers from 40ft. to 57ft. long in the top position. The car is about 204 scale feet long.

Our model of these three-unit cars is over 15in. long and features precision die-cast metal bodies for superior tracking even when empty. There is no need to add weight to the containers, in fact that will raise the center of gravity. The brake detail, end platforms, container bumpers, steps, grab irons and articulators are injection molded plastic, and all the walkways and lift rings are see-through etched stainless steel. They are equipped with body mounted Micro-Trains Line® operating knuckle couplers. Like the prototype, the DeLuxe Maxi-Stack IV will fit all standardized 53ft. or shorter containers in each bottom position, including two 20ft. containers, and all 40ft. or longer containers in the upper position. The box has vacu-formed nests with removable container inserts allowing it to be used as a storage and carrying case, empty or loaded with containers. Be sure to save the container inserts for transporting them empty or damage may result. The DeLuxe Maxi-IV is engineered to run on a minimum radius of 9-3/4in. but will look better on wider curves.
