MEMO DEALER LETTER JUNE-2015

SHOW TIME!!

Now that the rains have ceased and the sun is shining it is time for summer show season. The next big stop is Sacramento on June 25th through June 27th for the National N Scale Convention. If you are in the area be sure to stop by our tables and say hello to Doug and Kirk and get all of the latest InterMountain news first hand.

Later in the summer we will be in Portland for the National Train Show at the site of the NMRA National Convention. Dates for that show are August 28-30. At that time we expect to have some welcome news about eminent projects. Some of those long-awaited premium products are anticipated to arrive later in the year and important updates will be available in Portland.

HO SCALE ES44AC LOCOMOTIVES

Another set of GEVO's are available for advance reservation this month. This series of locomotives are ever changing in detail configurations, paint schemes for current users, and new owners. They will be a major factor in motive power for many years and are a must for any modern layout. InterMountain is committed to providing prototypical models that are highly and correctly detailed for the discerning modeler.

HO AND N SCALE CYLINDRICAL HOPPER CARS

These Canadian developed hopper cars have been widely used for the transport of grains and other materials for many years. They are expected to continue in service for many more years and are seen all across the North American continent, not just in Canada. The many interesting paint schemes add a lot of color to a cross country grain train for those modeling this era. This month provides another opportunity to add road numbers for eight of the most popular of these decorative schemes to your existing consist of hopper cars.

CANCELLED & DELAYED ITEMS

Please check the InterMountain website under Complete Upcoming Product Releases for current cancellations. On some items, lack of interest reflected in low advance reservation quantities make it impossible to proceed with production. We will only cancel items after making a concerted effort to reach the minimum production level.

ES44AC Locomotives

Announced: June 12

Reservations Due By: July 31

Available: Jan / Feb

The Evolution Series is GE's latest locomotive platform. These models features include: prototype specific details to match the cab, the trucks, the rear lights, etc., particular to each road name; etched metal details; wire grab irons; laser sharp paint and lettering; and Kadee® Couplers. All locomotives are factory equipped with ESU sound decoder or ESU non-sound decoder. DC available for N scale and DC plug option available for HO locomotives by request

ESU DECODER TESTER Item No. 51900 (MSRP \$57.90)

A GREAT INVESTMENT AT ONLY \$57.90!

Maybe you know the situation: In front of you there is a digital decoder on the workbench, and before you undertake its complicated installation into the loco, you would like to know if the decoder works as advertised. But, how do you test it? The Decoder Tester helps you. The Decoder Tester is simply hooked up to your DCC system, or the ESU LokProgrammer, and can be used to test any DCC decoders on the market. It has many DCC plug connections and includes a high end ESU motor, on board LED lighting, and a Speaker. All that is needed for a thorough test before installation!

Plug-ins for:

- NEM 652 (equivalent to NMR 8-pin)
- NEM 651
- Plux22 interface
- Next 18
- 21 MTC

*Also includes screw terminals for hardwire connections.

Due to its sensible features and simple handling, the Decoder Tester will soon become an indispensable helper in your shop! Works great when paired with our ESU LokProgrammer...

ESU LOK PROGRAMMER Item No. 53452 (MSRP \$199.99)

FOR YOUR OWN SPECIAL SOUND!

You want to listen to the sound spectrum of your favorite loco, or you want to add the special sound of that loco around the corner in the yard on your model railroad? No problem with ESU's LokProgrammer!

Includes:

LokProgrammer unit

US 110V power supply

USB adapter (Dimensions: 95mm x 85mm x 22mm (3.74 inch x 3.35 inch x 0.87 inch))

Only requirement is a PC with a sound card

What the LokProgrammer can do:

- Change the sound saved on the decoder.
- Sets of all digital parameters of the LokSound decoder such as address of the loco, operation speed, maximum speed, braking deceleration, brightness of bulbs etc. You can set all options with your computer very easily - no cumbersome entering of CVs (configuration variables) with your command station.
- Rearrange your sounds and transfer it to the LokSound decoder.
- You can use all sounds that can be downloaded to your computer hard disk.
- Sounds can be allocated to different events.
- Additional sounds can be activated via function buttons. Simple to use and its many functions makes the ESU LokProgrammer a must have for all train enthusiasts!
