# August 2015 Dealer Announcement

## *HO AND N SCALE SD40-2 LOCOMOTIVES*

This month we are announcing ten NEW paint schemes for the SD40-2 locomotive in both HO and N scales. These are very attractive schemes for this "workhorse" locomotive that has been so widely used in the railroad industry. Some of those offered are not well known regional and leased units, so they may never be produced again. Get your reservations in early so we can produce adequate quantities to satisfy everyone's needs.

## *HO AND N SCALE 1937 AAR BOXCARS*

We are very excited to offer ten NEW decorative schemes in this popular boxcar. New tooling will be done to correctly detail several of the offerings. We will be tooling the NSC-2 end for the Canadian National and Ontario Northland cars; and the C & O and B & O offerings will be equipped with the distinctive DECO ends and three panel CRECO doors. Who would ever have believed that detailing for ready-to-run model railroad equipment would get to this level? These tooling upgrades add a lot to an already exquisite model.

## *HO SCALE EVANS 100 TON COIL CARS*

Built in the late 1960's with many still in service across the country, this unique car has a place in almost every mixed freight consist. Sometimes run as a unit train, but more often seen as three to five cars within the mix. In this release we will be offering nine paint schemes formerly produced by Red Caboose, although several years ago, and one that has not yet been offered. Models will come with angled or curved hoods and either HydraCushion or Keystone underframes as appropriate to the road name. Six car numbers will be offered for each release.

## *PORTLAND -- HERE WE COME!*

We at InterMountain are very excited about the upcoming NMRA Convention and National Train Show in Portland, Oregon the last week of this month. If you are in the area be sure to come by Booth #407 at the National Train Show and see the NEW items!! Final tooling samples for the HO GP10 will be on the table for your viewing. We would be pleased to have you PICK THESE PARTS UP and take a closer look! Members of the InterMountain staff will be on hand to answer your questions, handle customer service items, and share information about exciting future plans. Looking forward to seeing you in Portland!!!

A handwritten signature in black ink, reading "Frank Angstead".

# LokSound L -Premium Quality Low Cost DCC and Sound in O Scale!

Coming Soon in "Atlas O"

Each Decoder set comes with Decoder and Adaptor board

## FULL FEATURED "LOKSOUND L SELECT" ESU Item# 73399 **\*\*ONLY \$149.99\*\*** Shipping Now!

- Dimensions: 1 Inch x 2 inch
  - Amperage: 3Amps continuous (up to 4Amps for a short time) Overload Protected
  - Function Outputs: 11(!)
  - Servo Outputs: 2
  - Sensor Inputs: 2 (Commonly used for Steam Chuff or other features)
  - Speaker outputs: 2 (Single Channel)
  - Pads for External volume potentiometer
  - Works with all currently available LokSound Select Soundfiles!
  - Firmware updatable
- 
- Perfect for ESU Synchronized Smoke Units 54678 and 54679 with supported Sound Files
    - Smoke units will work with Steam and Diesel files
    - Smoke units can be set up to work with Smoke Chuff and Cylinder Steam!

The Brand New LokSound L V4.0 and LokSound L Select decoders are made to fill a huge void in the O scale DCC market. For years now many have been using a large scale non sound decoder for the motor and wasting an HO Scale DCC and Sound decoder to operate the sound as no High Amperage, High Quality sound decoder has been available that will fit comfortably into an O scale locomotive. The wait is finally over! The LokSound L V4.0 and LokSound L Select decoders will easily use the many respective ESU V4.0 and Select sound files already on the market as they are of course programmable with the famous ESU LokProgrammer hardware.

The LokSound L decoder is still a combination of driving decoder and sound module on one PCB. You can install it in nearly every loco in O scale locomotive with its dimensions of only 2 inches in length and 1 inch wide! Made to Plug and Play in to New Atlas (and others) O Scale Locomotives, the Decoders will also come with an interface board for hardwiring into whatever Brand Locomotive you have.

With a constant current of 3Amps continuous (closer to 4amp for short periods) the decoder's load control will power all current O scale locomotives whether having 1 or 2 motors with ease. The decoder's hardware includes 11(!) function outputs, plus the ability run 2 servos, and inputs for 3 hall sensors (commonly used for syncing Steam Chuffs). You can also add 2 speakers as there are 2 separate speaker outputs (one Channel). Additionally there is the ability to add an external volume control and external power pack. Add this to the powerful logic contained in the LokSound V4.0 and Select technology already on the market and this new decoder is a force to be reckoned with! Finally "O Scalers" will have the Power, Sound and Motor Control they need, in a package that will fit in their locomotives!

**Also Available: 54399 Fully Programmable LokSound L V4.0 \$199.99**
