February 2016 Dealer Announcement

HO SCALE SD40-2 LOCOMOTIVES

Available for reservation are ten NEW paint schemes in this popular locomotive. Be sure to get your reservations in early as several of these schemes will probably not be produced again. They are extremely colorful and highly detailed; there is something that will appeal to nearly every HO modeler. Six road numbers are available in the Union Pacific scheme, and four road numbers in the other choices unless the owner had fewer locomotives.

SPECIAL RELEASE OF HO SCALE CANADIAN NATIONAL F7A & F7B LOCOMOTIVES

This is a once in a lifetime opportunity to acquire these very special HO F units in the modified diagonal stripe scheme. The 45 degree "lean forward" stripes on the left side of the locomotives were applied to a large number of both F7A and F7B units as a repaint scheme. The right side stripes were also at 45 degrees but were the traditional "lean backward" pattern. These locomotives are available immediately in four road numbers for the A units and three for the B units.

SHOW ACTIVITY

Our two show appearances in January were spectacular! The Prototype Modelers Meet in Cocoa Beach, Florida had nearly a 10% increase in attendance and featured almost 100 clinic presentations covering a myriad of subjects. We are really excited to see what next year will bring in Cocoa Beach!! The Amherst Model Railroad Club Model Train Show at the "Big E" in West Springfield, Massachusetts was a phenomenal success as usual with nearly 20,000 people attending during the two day show. It covered four buildings and it was impossible to see everything at the show even if you were there for two full days. You can truly say that if it wasn't at that show it doesn't exist in model railroading. Our next two shows will be:

Rocky Mountain Train Show:
March 5 & 6, Denver, Colorado.

SUPERTRAIN:
April 16 & 17, Calgary, Alberta.

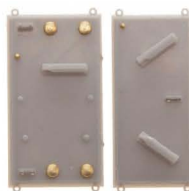

SUPERTRAIN is one of the premier shows in Canada that we try to attend at least every other year, and this is the year!! If you are in either area, be sure to come by the InterMountain booth during these shows and visit with the InterMountain staff members.

INTERMODAL - HO SCALE THRALL WELL CARS & 45FT. RIB SIDE CONTAINERS

The Thrall Well Cars are offered in a five car set. This offering is the version containing 45' wells on the intermediate cars. To complement this unique product, we are also making the 45' rib side containers available. The containers will come in three sets, each containing two road numbers. Two new paint schemes are available in both the Thrall cars and the 45' containers.

NEW GEVO ANTENNA PACKAGE

Since releasing our latest HO Scale Union Pacific ES44AC locomotive, we have had a number of requests for the PTC Antenna Array used on the model. We are pleased to announce that this modern detail part is now available as a kit! Due to the government mandated PTC regulations scheduled to take effect in the entire USA by the end of 2018, this antenna array is being installed on brand new Union Pacific, and other railroads', GE and EMD locomotives as they leave their respective factories. This antenna array is not limited to brand new units either, locomotives dating back to the mid-1990's that are roaming today's rails are also being retrofitted with this array. If you model the post-2008 era, this kit is perfect for your locomotive fleet, you wouldn't want your model locomotives to be out of compliance come 2018 would you? More information on the kit is available on our website in the HO Detail Parts section.

Frank Angstead
InterMountain Railway Company

SD40-2 Locomotives

Announced: February 12 Reservations Due By: March 31 Available: Sept / Oct

These SD40-2 locomotives will be manufactured with finely molded parts that have been designed to reproduce railroad specific details. All locomotives are factory equipped with ESU sound decoder or ESU non-sound decoder. DC plug option available upon request.

List: \$199.95
w/ Sound: \$289.95
