# May 2016 Dealer Announcement

**NEW HO LOCOMOTIVE COMING -  
WATCH FOR THE "DASH 9!"**

General Electric introduced this locomotive in 1993 and production continued through 2004. Several railroads ordered large quantities and most remain in service today for both original owners and secondary owners through mergers. Several variations of these locomotives will be offered in order to make them as detail-specific as possible. Prototypical accuracy and a high level of detail are the objectives!! These will make great running mates with our ES44's and our recently announced Tier IV ET44 locomotives. *Locomotives produced under license from the General Electric Company.*

**HO SCALE 14 PANEL  
COALPORTERS**

The first offerings of the Value Line HO Coalporters® were well received. This month brings twelve NEW paint schemes, each with thirteen road numbers. These models will be sharply decorated and equipped with InterMountain metal wheelsets and operating couplers.

**HO SCALE CENTRALIA CAR  
SHOPS NE-5 CABOOSSES**

These colorful models have not been offered for several years. A rerun of the most popular paint schemes gives modelers from the 50's, 60's, 70's and beyond an opportunity to fully equip their consists. Be sure to place your Advance Reservations and get them while they are available.

**MEMORIAL DAY  
SALE**

Watch for the Memorial Day Sale!! Many items in both HO and N scales will be available in limited quantities. As usual, they will be offered on a first-come, first-served basis. The listing will be placed on the website on May 19th at 10:00am MDT and the sale will continue through June 6th. Contact your InterMountain Sales Rep for details.

## **TECH TIP!**

***Use F8 as a "Start-up" and "Shut-down" key with  
ESU® LokSound® Select Sound Decoders***

Currently, our HO Scale ESU® sound equipped locomotives start-up upon receiving track power. Future releases of our sound equipped locomotives will remain quiet upon receiving track power. This helps keep the noise level and current draw more manageable on your layout. To start-up the locomotive, function 8 will need to be pressed on your DCC system. When you are finished operating, another press of function 8 shuts the locomotive down. You will continue to hear some sounds for up to 1 minute after the shut-down sequence. Also, sounds that don't require the prime mover can still be activated such as the horn and bell, just like the prototype!

This setting can be enabled on all previously released InterMountain sound equipped locomotives with ESU® LokSound®:

First set CV 32 to 2, then set the following based on your locomotive type:

F units: CV 387 = 16

U18B: CV 403 = 16

SD40-2(W): CV 419 = 16

ES44: CV 403 = 16

This and many other helpful tips and tricks for ESU® decoders can be found on our website <http://intermountain-railway.com>. Click Customer Service, DCC Assistance, and \*ESU® Decoder Tips, Tricks, and other Useful Information\*. As always if your question isn't answered here, call us at 1-800-472-2530 or e-mail us at [intermountain@intermountain-railway.com](mailto:intermountain@intermountain-railway.com) and we'll be glad to help.

In 1993, General Electric introduced the C44-9W locomotive, which quickly became known as the "Dash 9." Among the railroads to order them were Santa Fe, Burlington Northern Santa Fe, Union Pacific, Chicago & North Western and Southern Pacific. These locomotives were produced in large quantities for these and other North American railroads until the end of 2004. The C44-9W continue in service today for their original and subsequent owners with many being given a new lease on life in various rebuild programs.

The InterMountain Railway Dash 9 will include all of the features you have come to expect from our locomotive products. The Dash 9 will be offered in multiple phases representing road specific and order specific details whenever possible. Among the variations that will be offered; Three and Four Window Cabs, Canadian Teardrop Window Cab, High and Low Headlights, and Early and Late Radiator Intake grilles. These locos will be available with ESU® sound decoder or ESU® non-sound decoder. DC plug available upon request.
