

InterMountain Railway Director of Research & Development,
Gene Fusco, at the GE facility in Fort Worth Texas.

HO Scale **Tier IV Gevo** Locomotive Update

We at InterMountain are very excited about our upcoming HO Tier IV GEVO project. The Tier IV is the locomotive of the future for the North American transportation industry. It is the culmination of many years of dedicated effort on the part of General Electric to produce a power source for North American railroads that meets current emission standards making it environmentally friendly.

Gene Fusco, InterMountain's Director of Research and Development, personally visited the General Electric facility in Fort Worth and accumulated a massive amount of detailed information which has aided in our effort to produce as accurate a model as possible. This information will also assist us in making the models for each road name detail specific. Each of the current owners of the Tier IV GEVO's has ordered locomotives with specific features. We will duplicate these configurations in the production of the models for each road name.

While there are only five current owners of the Tier IV locomotives, it is anticipated that several others will emerge over the next few years. As GE delivers the Tier IV to these new owners, we will continue to furnish the sharply detailed and highly accurate new paint schemes to the marketplace.

As one of several companies that are currently licensed with General Electric, we are committed to producing models as accurately as possible, respecting the great effort and cost GE has gone to in developing and producing the prototype.

We are pleased to announce that our HO Tier IV GEVO project is currently on schedule. Please watch the InterMountain web site for further updates.

February 2017 Dealer Announcement ***N SCALE SD40-2 LOCOMOTIVES*** ***(HO SCALE, TOO!)***

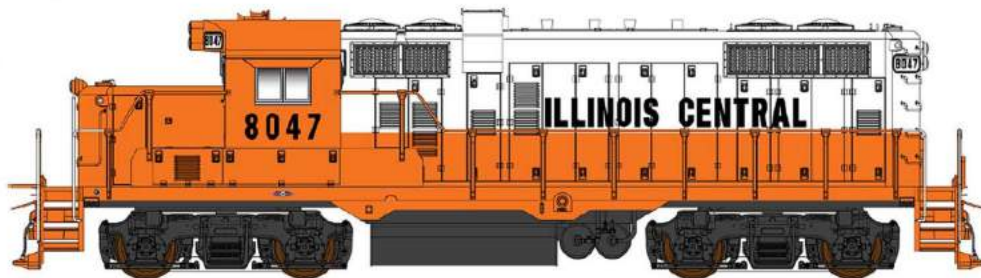

The first releases of the N scale SD40-2 locomotives were so well received that we are doing IMMEDIATE reruns of several paint schemes. These new items will have ALL NEW road numbers! If you missed out on these items the first time around place your order EARLY. (We are also doing all of these reruns in HO as well.)

For those of you that want to do a private road name or just can't wait for us to do your favorite road, we are announcing the availability of SD40-2 kits in both N and HO scales. Each kit will have all of the detail options to do your specific model. (All variations of nose, cab, etc. will be included in each kit.) Both North American and Canadian versions will be offered.

This month also features ten new highly popular decorative schemes for the N scale version of the SD40-2. These are some of the most prominent schemes done on this locomotive. They will have road specific details and DCC and sound units will be equipped with ESU "slide-in" decoders.

GP10 PADUCAH LOCOMOTIVES

The GP10 is here!! This month features the delivery of the first five paint schemes of the long anticipated GP10 locomotive. Equipped with ESU decoders, these work horse locomotives will be a welcome addition to any modelers late transition layout, especially if it includes an Illinois Central theme.

The remaining eleven paint schemes on Advance Reservation will be delivered over the next two or three months.

Frank Angstead
InterMountain Railway Company

SECOND RUN ANNOUNCEMENT SD40-2 Locomotives

Announced: February 13

Reservations Due By: March 31

Available: Sept / Oct

HO List: \$199.95
w/ Sound: \$299.95

N List: DC: \$139.95
DCC: \$189.95(D)
DCC & Sound: \$249.95(S)

These SD40-2 locomotives will be manufactured with finely molded parts that have been designed to reproduce railroad specific details. All locomotives are factory equipped with an ESU sound decoder or ESU non-sound decoder. DC available for N scale and DC plug option available for HO locomotives by request.

GP10 PADUCAH LOCOMOTIVES

Through the 1970's, the Paducah shops of the Illinois Central rebuilt worn out EMD GP7 & GP9 locomotives into the GP10. The InterMountain Railway Company HO Scale GP10 Locomotive will be manufactured with finely molded parts that have been designed to reproduce railroad specific details -- HORST Air Filter, Horizontal Nose Headlight, Extended Right-front Tool Box, & Engine Access Hatches on the roof. Sound locomotives are factory equipped with ESU® LokSound Select sound decoders, and non-sound locomotives are factory equipped with ESU® LokPilot non-sound decoders. For DC only operation, a DC plug option is available upon request.

Suggested Retail Price: \$189.95
with sound: \$279.95

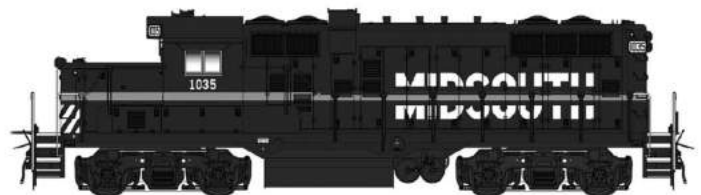

ILLINOIS CENTRAL
(STOCK #49801(S))

These locomotives are decorated for IC in orange and white.
