

AVAILABLE NOW TIER 4 LOCOMOTIVES

Under License From GE Transportation

THE PROTOTYPE

The Tier 4 has been called the locomotive of the future.

GE has gone through several iterations of the GEVO's during the last decade, working toward the Tier 4, which meets the current Government emissions standard for locomotives. At great cost they have developed this eco-friendly transportation giant that is already in service all across North America. Five major railroads are currently running the Tier 4 and other primary and secondary users are expected to follow.

PULLING TEST

There is an amazing video that is accessible on the home page of our website showing a sample of our Tier 4 pulling forty-five 57' refrigerator cars on John Parker's extraordinary BNSF layout. All of the cars are weighted to NMRA standard. This is the equivalent of more than sixty 40' cars similarly weighted. The 32 car tank car train is running on a track section that includes going up a 1.8% grade. What a work horse! (It may not be fair, however, as all of the cars are equipped with fabulous InterMountain metal wheelsets.)

THE INTERMOUNTAIN MODEL

Upon seeing the pre-production samples of the InterMountain Tier 4 several modelers commented that it is the most highly detailed, with owner specific details, prototypically accurate HO locomotive model ever produced. InterMountain has re-tooled every version of the GEVO's, beginning in 2005, to acquire and maintain this level of accuracy. One of the comments made on the internet was that InterMountain probably used existing GEVO tooling for the Tier 4 even though the Tier 4 is nearly two feet longer than its predecessors. WRONG! The InterMountain Tier 4 was completely re-tooled to capture the highest level of accuracy. We invite you to get out the calipers!

DELIVERY Thanks to a superb effort on the part of our development team, including our off-shore manufacturer, shipping of the HO Tier 4 will begin next week! Three of the road names will be shipped initially with the other two right behind. Thanks to all of you for your patience over the past several months. We think it will prove to be worth the wait.

SHOW SUMMARIES

National N Scale Convention Presented

by N Scale Enthusiast *Pittsburg, Pennsylvania - June 23, 24, & 25*

Several hundred avid N scalers roamed the aisles of the show sharing their requests with manufacturers and viewing the available product.

Prominent InterMountain product – N Scale SD40-2 locomotive. Many modelers were stunned to see a wireless N scale locomotive and to hear the great sound. The "slip-in" PC board and speaker, exceptional products of ESU, will make repairs and change-outs much easier than ever before.

St. Louis Railroad Prototype Modeler's Meet

Collinsville, Illinois - June 23 & 24

With over 500 in attendance, this is perhaps the largest prototype meet in the US this year. Numerous clinics and contest level models are the features of the Prototype shows. This one was a tremendous success.

Prominent InterMountain product – HO GP10 locomotive. Many of the prototype guys and gals are IC/ICG modelers, so this locomotive was a perfect fit.

Spring Creek Models Open House & Train Show

Deshler, Nebraska - July 1 & 2

Where in the world is Deshler, Nebraska? Located on the plains of Nebraska about an hour west of Lincoln, this village of 747 was overrun by over 800 model railroaders from over 15 states during the first weekend of July. Deb and Dave Zucker, owners of Spring Creek Model Trains hosted their second bi-annual Open House at the fairgrounds in Deshler and the event was a great success. Deb and Dave have built a large following by exhibiting at 40 to 50 model train shows a year over the past several years, and this event was a tribute to their success.

Prominent InterMountain product – HO Tier 4 Gevo locomotive. With delivery less than two weeks away, many modelers at the Spring Creek Open House were anxious to see the two samples of the Tier 4 pull a looooong train of sixty-six freight cars on the nearby HO layout.

SAVE THESE MODELS!

The following sets of freight cars are in danger of being cancelled due to lack of interest. If you have any interest in these models, please contact your dealer and request that an Advance Reservation be submitted. If the interest is adequate we will proceed with production at the earliest possible date.
